

**VALIDATED FOR
67 METALS AND 2 ANIONS.**

The SingleSample® High Capacity, Disposable Groundwater Filter Cartridge: Designed especially for field filtering groundwater samples for metal analysis.

The SingleSample® High Capacity, Disposable Groundwater Filter Cartridge features:

- True membrane element.
- Certification for 67 metals and 2 anions.
- Completely inert components and assembly process.
- Ready to use.
- Individually sealed packaging.
- 1/8" NPT threaded ends with stepped hose adapter on inlet side.
- .45µm, 1µm and 5µm elements available.

QAQC.

The above manufacturing procedures apply to all products manufactured by Voss Technologies. Our initial process and procedure was validated by an independent laboratory using EPA Methods 601, 602 and 625.

Conformity to validated procedure and process is verified daily by the production supervisor. Visual process and product inspections and random product checks are performed.
